

For the very curious, we recommend the video "tradizionando", to learn about crafts, techniques, and models used in Umbrian traditional crafts.

Here lies the rediscovery of the professionalism that has kept our local economy alive, with interesting references to the stories of master craftsmen, ranging from chair-makers and menders to the artisans who work with the Trasimeno lake *cannina* reeds and those who make wicker baskets. There are also the blacksmiths and manufacturers of rasps in Sellano, goldsmiths, lute-makers, carpenters, cabinetmakers, potters and artisans specialized in *racotta* earthenware.
